

GenRad AccelerATE in-line fixture

Both GenRad and ITE have approved the AccelerATE in-line fixture for use on the GenRad automated in-line tester. We are one of only a handful of companies authorized to produce this fixture for the GenRad tester. The unit is specifically designed for automated testing in a high volume environment. The unit is equipped with separate base and head assemblies, which allow for easy connection to the tester. All the components of the unit are of rugged design and permit the unit to be durable and long lasting.

GenRad AccelerATE in-line fixture

Dimensions in inches (mm)

Model	Max UUT (AxB)	Width	Length	Height	Weight
Kit 65 Lower Unit	17.36 x 14.8 (441 x 376)	21.0 (533)	14.3 (363)	6.0 (152)	26 lbs.
Kit 66 Upper Unit	17.36 x 14.8 (441 x 376)	17.7 (450)	18.6 (472)	7.85 (199)	24 lbs.
